Redwan Kara, Lucien Burdet, Marouane Azzouz, Emilio Maldonado

Plan:

- I Introduction :
 - a) Présentation de l'architecture
 - b) Présentation générale des choix d'implémentation
- 🔘 II Projet :
 - a) Organisation du projet
 - b) Cas par cas
- ☑III Conclusion :
 - a) Démonstration vidéo
 - b) Conclusion Bilan

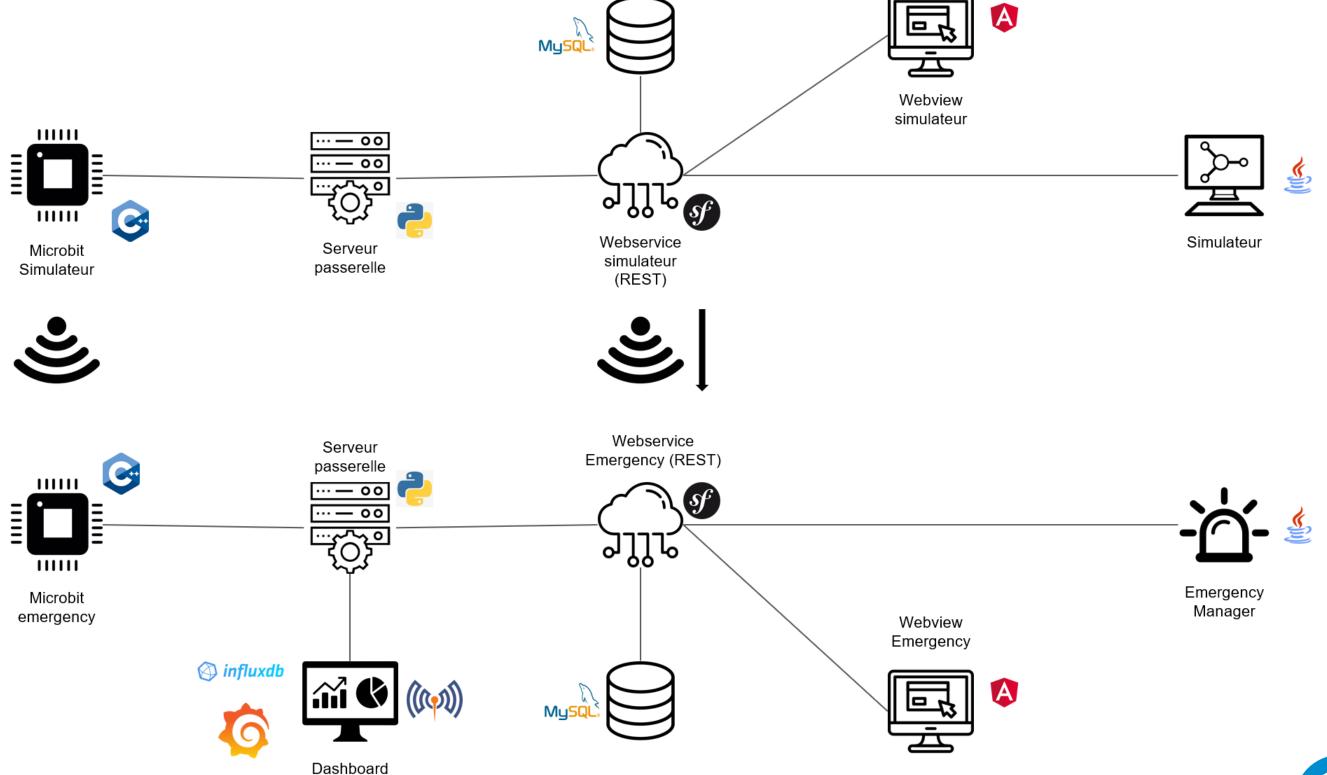

I - Introduction

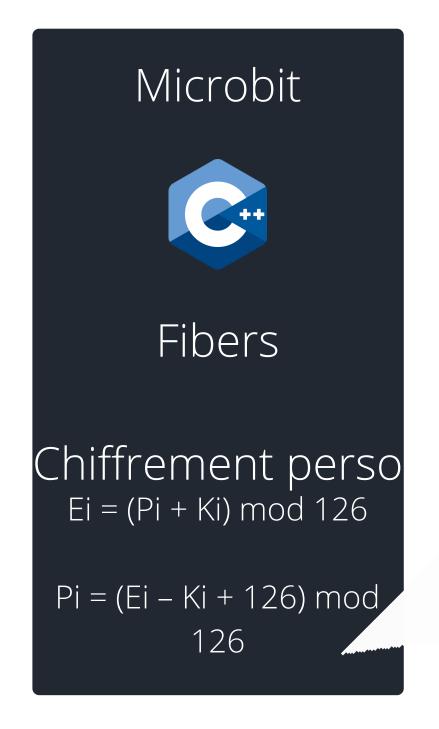

a) Présentation de l'architecture :

a) Présentation générale des choix d'implémentation :

a) Organisation du projet :

Marouane

Lucien

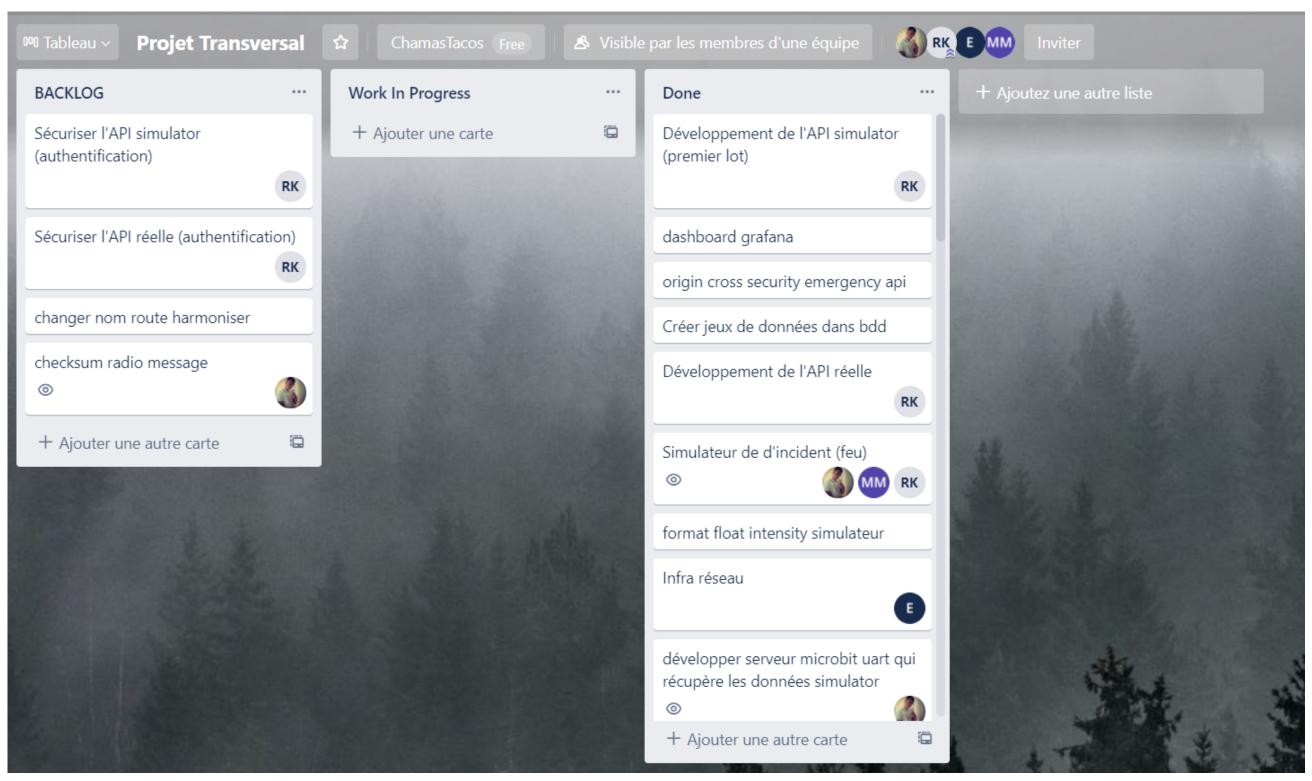

Redwan

a) Organisation du projet :

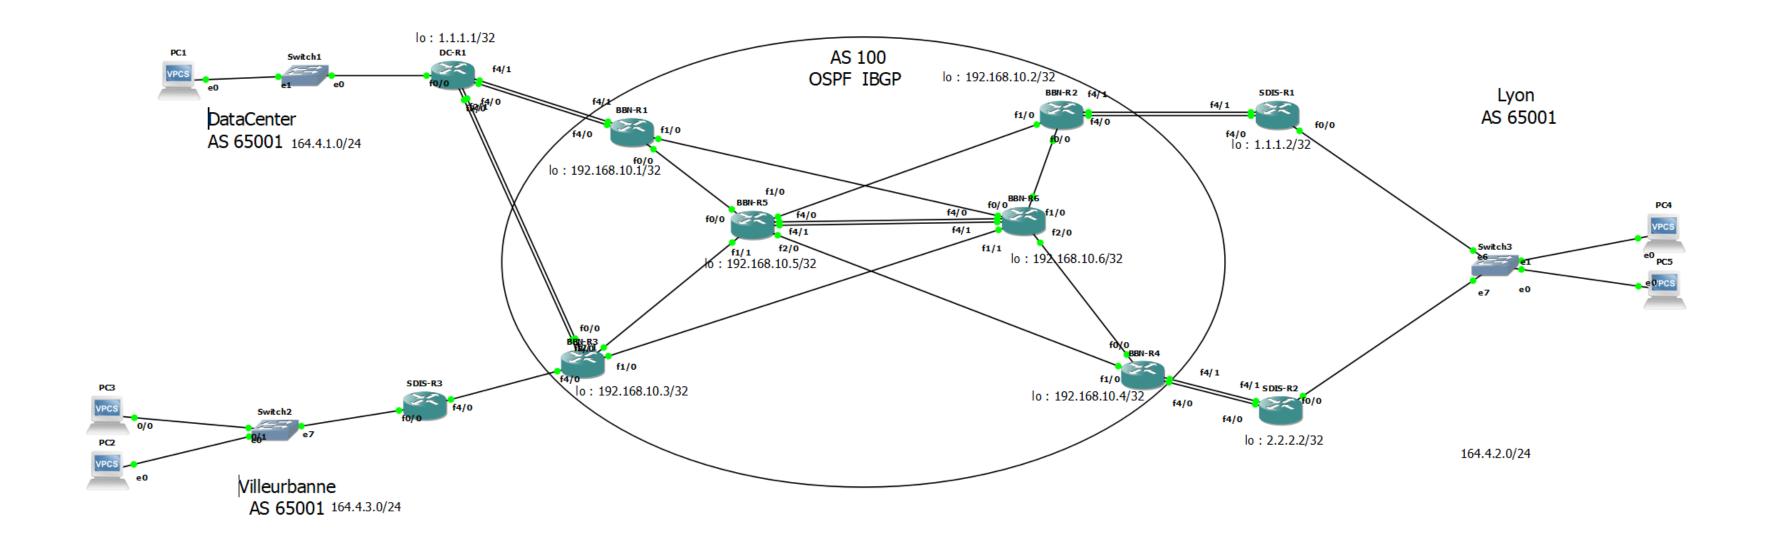

a) Organisation du projet :

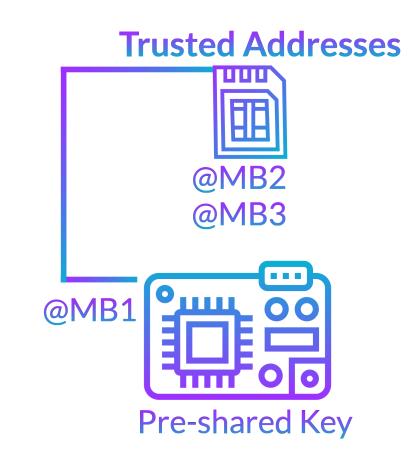

b) Infrastructure réseau:

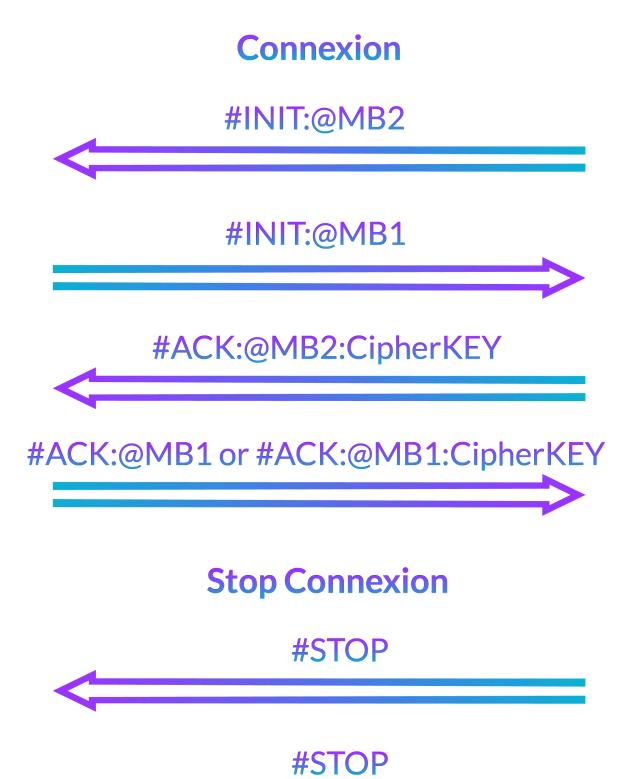

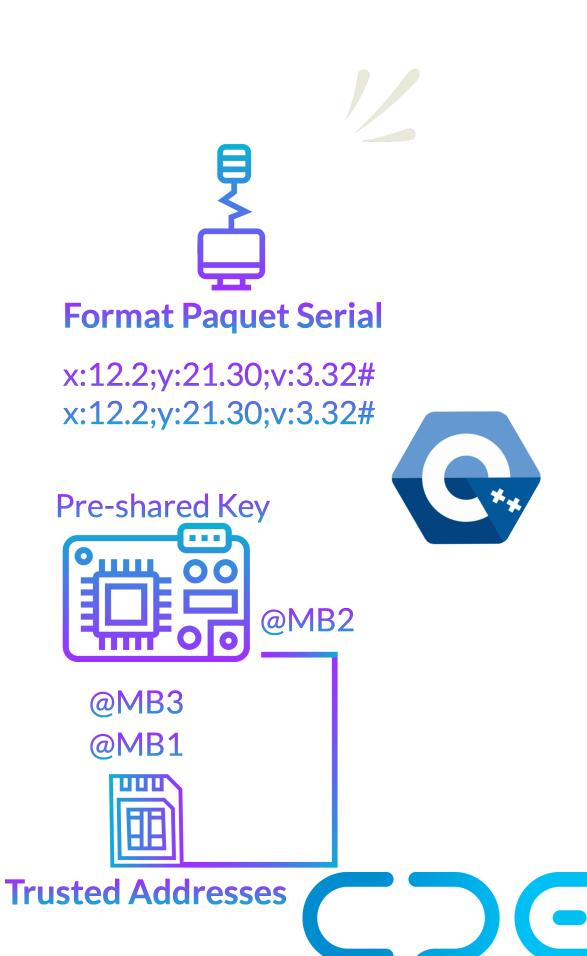

b) Architecture IOT:

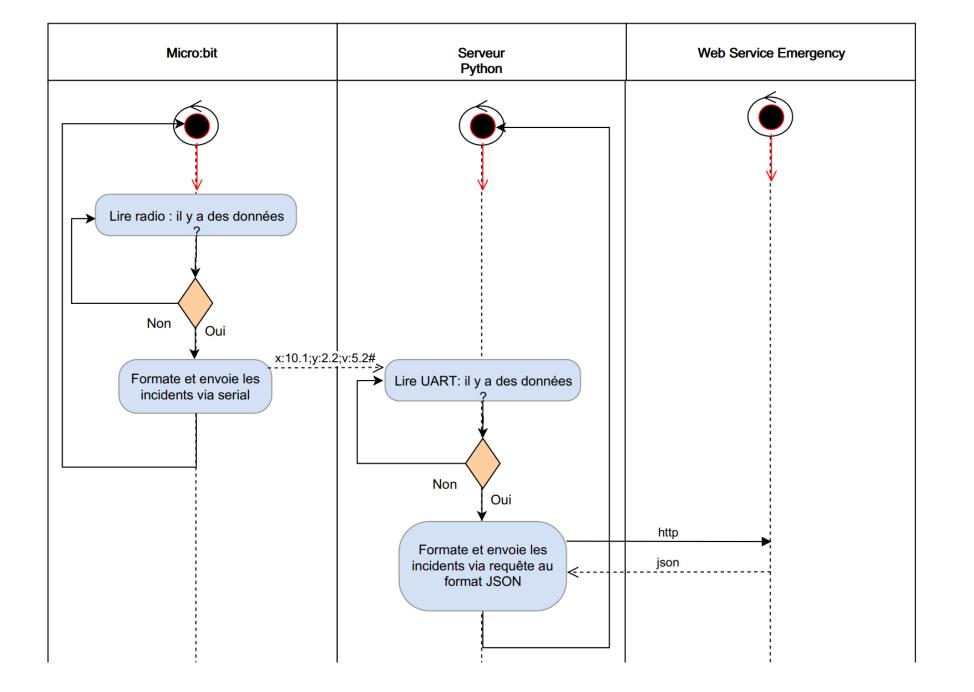

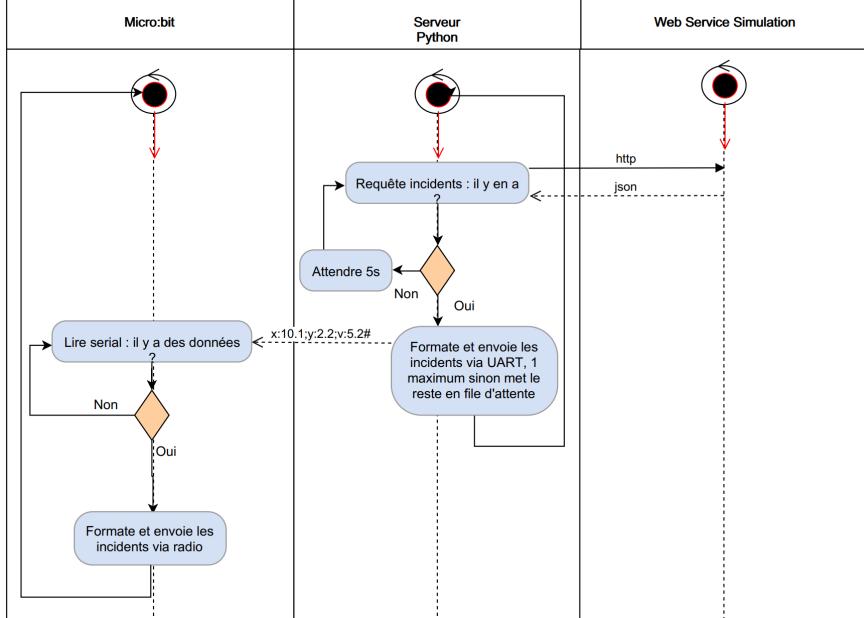

Format Paquet Radio

@Source;@Dest; x:12.2;y:21.30;v:3.32#

b) Architecture IOT:

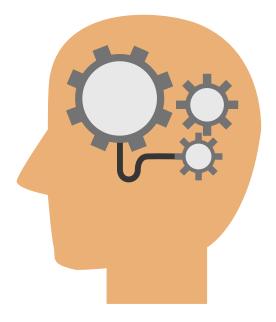

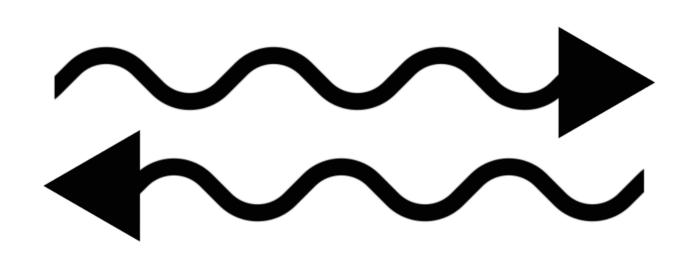

b) Architecture logicielle:

Emergency Manager

2 Threads: appels réguliers API + simulation Génère incidents Modifie intensité

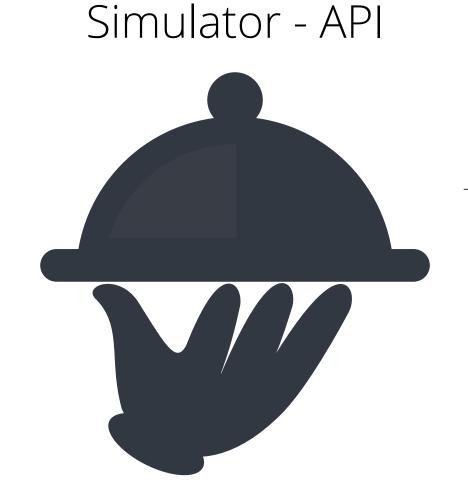

Thread listener
Affectation des équipes
Envoie des interventions

b) Architecture logicielle:

architecture logiciene

Requetes regulieres

Emergency- API

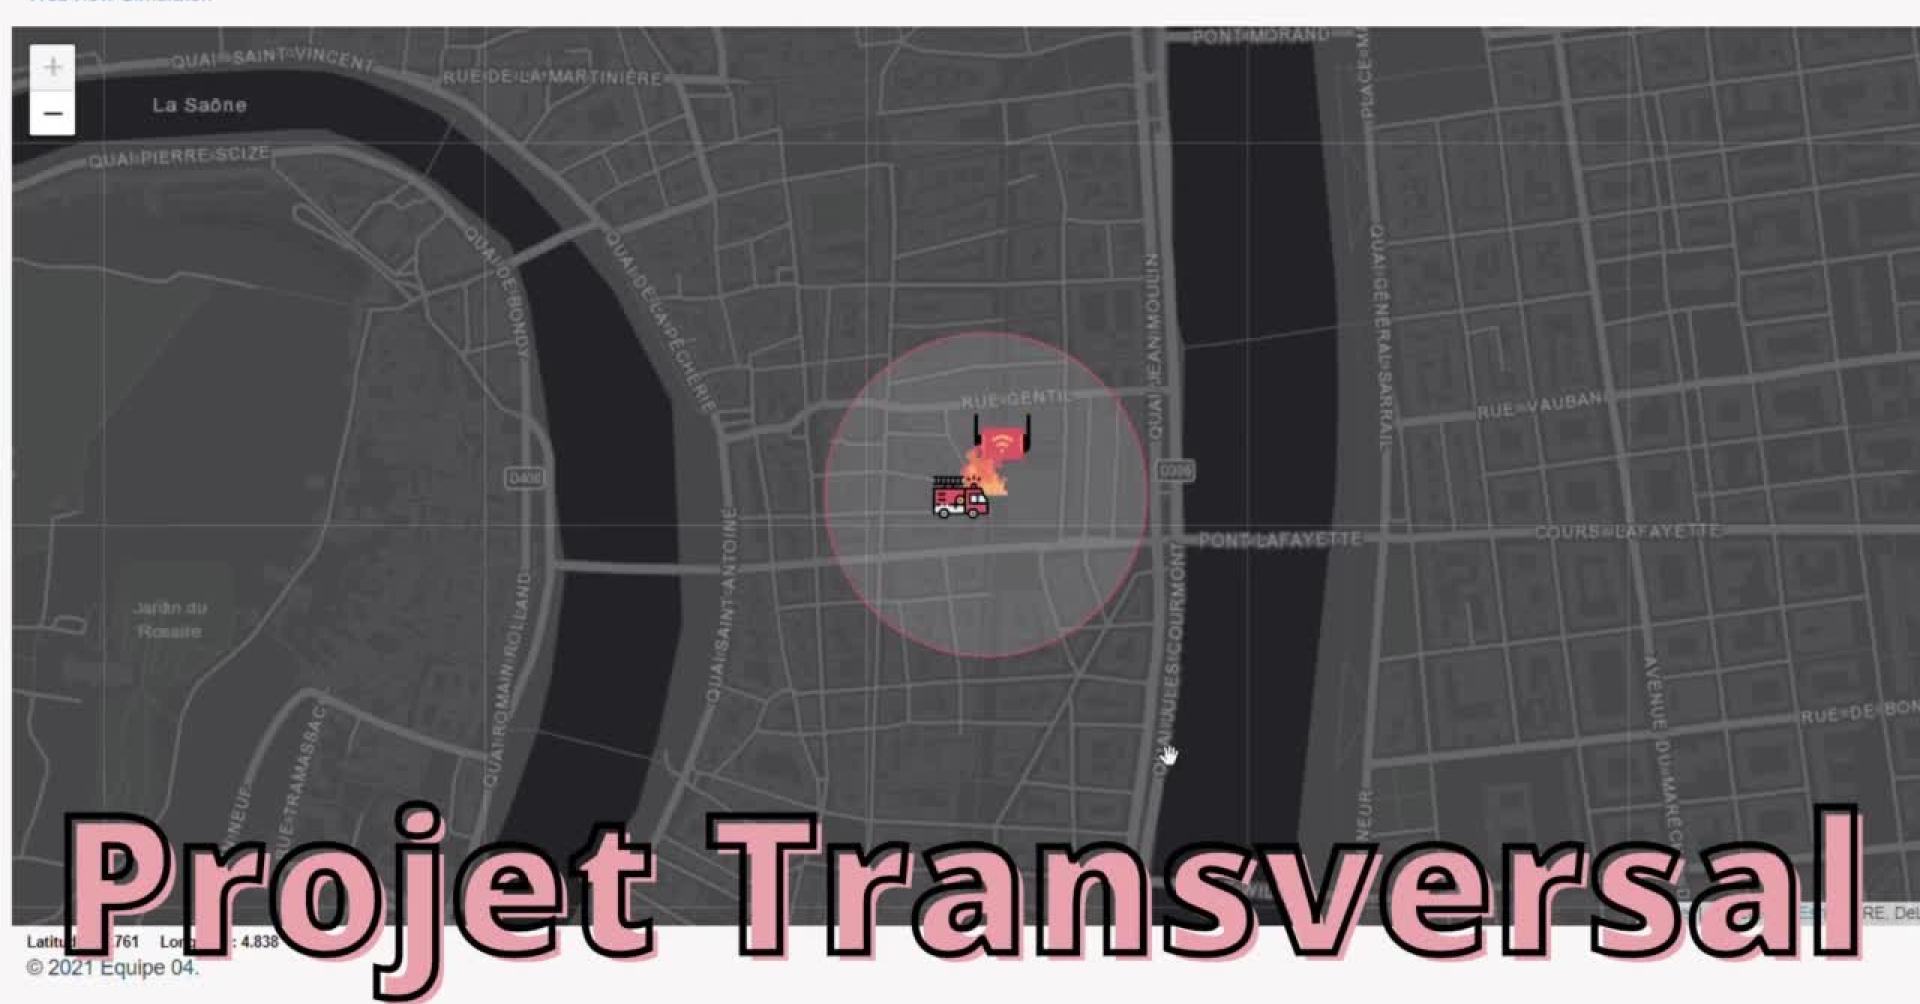

Gestion interventions
Passerelle
Persistence données

WebView Simulator.

b) Conclusion - Bilan:
